REGIONS AND CITIES

EDITED BY LISA DE PROPRIIS
AND DAVID BAILEY

Industry 4.0 and Regional Transformations

This edited volume brings together a group of expert contributors to explore the opportunities and the challenges that Industry 4.0 (smart manufacturing) is likely to pose for regions, firms and jobs in Europe. Drawing on theory and empirical cases, it considers emerging issues like servitization, new innovation models for local production systems and the increase in reshoring.

Industry 4.0 and Regional Transformations captures the complexity of this new manufacturing model in an accessible way and considers its implications for the future. It will be essential reading for advanced students and researchers and policy makers in regional studies, industrial policy, economic geography, innovation studies, operations management and engineering.

Lisa De Propris, Birmingham Business School, University of Birmingham, UK.

David Bailey, Birmingham Business School, University of Birmingham, UK, and Senior Fellow, the UK in a Changing Europe programme.

Regions and Cities

Series Editor in Chief

Joan Fitzgerald, *Northeastern University, USA*

Editors

Roberta Capello, *Politecnico di Milano, Italy*

Jörg Knieling, *HafenCity University Hamburg, Germany*

Nichola Lowe, *University of North Carolina at Chapel Hill, USA*

In today's globalised, knowledge-driven and networked world, regions and cities have assumed heightened significance as the interconnected nodes of economic, social and cultural production, and as sites of new modes of economic and territorial governance and policy experimentation. This book series brings together incisive and critically engaged international and interdisciplinary research on this resurgence of regions and cities, and should be of interest to geographers, economists, sociologists, political scientists and cultural scholars, as well as to policy-makers involved in regional and urban development.
