Mathematical Methods in Economics and Finance publishes original papers that contribute to theory, methodology and applications in the areas of mathematical economics, financial mathematics, mathematical finance, actuarial mathematics, management science and operational research.

Papers may be submitted via e-mail to: m2ef@unive.it.

Papers must be written in English according to the journal formatting guidelines (please download and use the template file *m2ef–Template.zip* from the journal website).

All submitted papers will be double-blindly peer reviewed by at least two anonymous referees.

Free download of published papers is available from the journal webpage.

Contents

Preface I
Igor Bykadorov

Analysis of the post-merger efficiency of companies in the wholesale electricity market by the example of Russia 1
Natalia Aizenberg, and Alexandra Banzarova

On manipulation in information space 17
Mikhail A. Alekseev, and Vladimir V. Glinskiy

Econometric modeling of economic growth factors of the Russian Federation regions 29
Yuliya Ismaiylova, Kirill A. Zaykov, and Elena Makaridina

Employment and unemployment in Siberia 39
Sergey Kapelyuk, Elena Lishchuk, and Elena Zolotareva

Construction of the criterion of a checking of the presence of structural shifts in researching of time series 57
Sergey E. Khrushchev, Artem V. Logachov, and Olga M. Logachova

Monopolistic competition in the retail industry: the role of government regulation 63
Marina Pudova

An innovative methodology for evaluation 71
Oleg Ryzhkov

Preface

This is the special issue of *Mathematical Methods in Economics and Finance* devoted to the *International Scientific Forum "Education and Entrepreneurship in Siberia: directions of Cooperation and Development of Regions"* held in Novosibirsk (Russia) from October 12 to 13, 2018.

The Forum was dedicated to the 50th anniversary of Novosibirsk State University of Economics and Managements. The purpose of the Forum was to contribute to the formation of a scientific environment that

- stimulates research into the application of business-oriented educational technologies, taking into account regional development strategies;
- creates favorable conditions for interdisciplinary studies of organizational, technological, institutional and behavioral factors in the functioning of the entrepreneurial university and training of business engineers.

This issue collects a series of original papers freely submitted to the journal by Contributors of the conference and, following the usual practice, each peer reviewed by at least two anonymous referees.

Guest Editor:

Igor Bykadorov
